Agralite Account No.(s) _____

Phone _____

A renewable energy certificate (REC) is a legal transaction that one megawatt-hour of power was produced by a renewable energy source, like wind or solar. RECs are generated after a megawatt-hour of electricity is produced by a renewable energy resource. This rate adder enables members of Agralite Electric Cooperative to purchase RECs to offset their electrical usage with generation from renewable resources.

Availability: Available to all consumers. Single phase or multi-phase. Service is subject to the rules and regulations of Agralite Electric Cooperative.

Monthly Rate: \$1.00 per 1,000 Kwh adder to applicable energy rate schedule, plus applicable sales tax. The price adder will be reviewed annually.

I authorize Agralite Electric Cooperative to add the REC adder rate to my account. This authority will remain in effect until Agralite receives written notification from me to discontinue.
